Ecoloturf[™]

An earth-friendly, turfgrass option using less water and fertilizer.

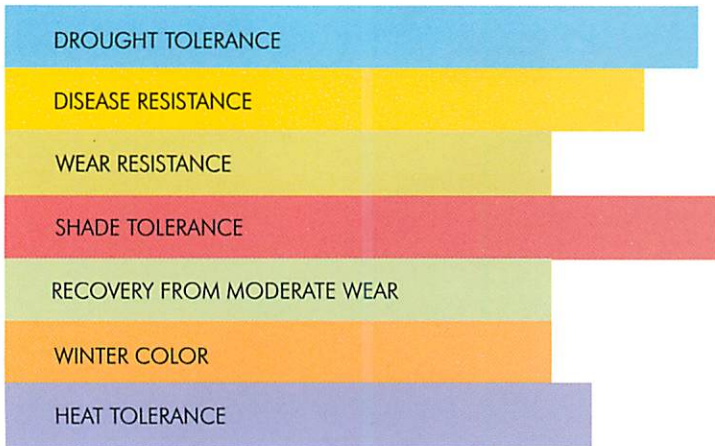

Ecoloturf is a combination of new hybrid fine fescues and bluegrass which are genetically bred for drought tolerance and a beautiful green color. Ideal for "GREEN Building" situations since it requires decreased water, fertilizer and pesticide applications. Ecoloturf has a medium-fine leaf texture, adapts well to shade, tolerates moderate traffic and adapts well to both urban and mountain ecologies.

MAINTENANCE GUIDE

WATERING: For the first 20 days, water as needed to keep the topsoil moist to a 3-inch depth. After 20 days, water three or more times a week during warm weather. In cooler weather, water deep, once or twice a week. Sandy soil requires more frequent watering than clay soil. Slopes and mounds may require more attention due to water run-off. Irrigation may be 30-35 percent less than Bluegrass and Tall fescue.

FERTILIZATION: Apply 7 days after installation and about every two months during the growing season with a SLOW-release fertilizer at full rate as indicated on the bag. Use a 20-10-5 with 5% Iron. Reduced fertilizer applications assist the ecology!

MOWING: Mow seven days after installation. Mow to a height of 2-1/2 to 3+ inches. Weekly mowing is recommended. Never mow more than one-third of the blade at one time, it may injure the plant.

DISEASES: Ecoloturf is highly resistant to most common diseases that might affect other turfgrass.

WEEDS AND INSECTS: After 4 weeks, if needed, one can apply a herbicide for any broadleaf weeds. Contact a garden center if insects ever appear.

TECHNICAL DATA

Common Name: Ecoloturf
 Species: Fine fescue / Bluegrass Mixture
 Growth Rate: Summer 3/4 to 1 inch per week
 Root Depth: 3 to 4-1/2 feet deep depending on soil type and water application.

ADAPTABILITY
 Soils Range: Fair to moderate saline soil conditions.
 Soil Amendment Recommendation: 4-5 cu. Yd/1000Sqft.
 Temperature Tolerance: 0° to 110°F.
 pH Range: 6.0 to 8.5

Shade Tolerance: High shade tolerance
 Geographic Range: Plains to Mountain altitudes

STANDARDS AND MEASURES

100% Weed Free
 Size: 8 to 10 sq. ft. per piece
 Big Rolls: 500 sq. ft.
 Soil Thickness 1/2 inch ± 1/8 inch + top growth
 432 to 540 sq. ft. per pallet
 Weight: 1500 to 2700 lbs. per pallet
 Grown from Certified Sod Quality seed.
