

Premium NATURAL GRASS

Blue Rye

A combination of improved Kentucky Bluegrass and perennial ryegrass suited to the West. This blend provides a year-round dark green color, fine texture and a lushness and appeal unequalled by other grasses. The natural rhizome structure of bluegrass will fill in damaged areas.

MAINTENANCE GUIDE

WATERING

For the first 20 days, water as needed to keep the topsoil moist. After 20 days, water three or more times a week during warm weather. In cooler weather, water once or twice a week. Sandy soil requires more frequent watering than clay soil. Inland areas require more water than coastal areas. Special attention should be paid to slopes and mounds where runoff occurs. More frequent, shorter watering may be necessary.

FERTILIZATION

Fertilize in six to eight week intervals during warm weather, depending on your lawn's color. Light green is an indication that your lawn needs fertilizer. Use an all-purpose fertilizer and follow label directions.

MOWING

Mow seven days after installation. Mow to a height of 1 1/4 to 2 inches. Blue Rye should be mowed at least once a week. Never mow more than one third of the blade at one time; it may injure the plant.

DISEASES

Blue Rye is fairly resistant to common disease problems. The appearance of brown spots may be a result of a watering problem. If brown spots remain after adjusting your watering routine, a disease may be present. Consult your local garden center as soon as possible.

WEEDS AND INSECTS

After your new sod has been established at least four weeks, you may begin pesticide application for insect control, if necessary. Because pest and weed conditions vary from area to area, it is best to follow the recommendations of your local garden center or the extension specialist for your area.

TECHNICAL DATA

Common Name:	Kentucky Bluegrass/Perennial Ryegrass Blend
Species:	Poa pratensis – Kentucky Bluegrass Lolium perenne – Perennial Ryegrass
Growth Rate:	Summer 3/4 to 1 1/4 inches per week Winter 1/4 to 3/4 inches per week
Root Depth:	3 to 5 feet, depending upon soil type and watering patterns.
ADAPTABILITY	
Soils Range:	Fair tolerance to saline soil conditions. Amendments are recommended for heavy clay soils to promote drainage.
Temp. Tolerance:	0°F. to 110°F.
ET₀:	.6 minimum, .8 preferred
pH Range:	5.0 to 8.5, 7.0 optimum
Shade Tolerance:	Prefers full sun, but tolerates 40% shade.
Geographic Range:	(Refer to temperature tolerance above.)

STANDARDS AND MEASURES

Size:	8 sq. ft. per piece 480 sq. ft. per pallet Big Rolls: 200 to 500 sq. ft. Soil Thickness: 1/2 inch ± 1/8 inch + top growth
Weight:	2,500 to 3,000 lbs. per pallet
Seed Rate:	2 to 3 lbs. per 1000 sq. ft.
Other:	100% Weed Free Sod Grown from 100% Weed Free seed – 98% purity (2% inert maximum) Blend Varies by location
